#### County Vision and Mission

#### **Vision**

A wealthy, transformed and equitable county that provides quality life to its citizens.

#### **Mission**

To transform Nyandarua through a practical, realistic and measurable strategy of economic, political and social transformation that brings every citizen on board to build a greater county and ensure equal distribution of resources and opportunities.

#### A.3 Overview of Kenya National Bureau of Statistics

Kenya National Bureau of Statistics (KNBS) is a State Corporation in the National Treasury and Planning established by the Statistics Act, 2006. KNBS has offices in all 47 counties.

#### Mandate

- 1. Plan, authorise, co-ordinate and supervise all official statistical programmes undertaken within the national statistical system;
- 2. Establish standards and ensure the use of best practices and methods in the production and dissemination of statistical information across the national statistical system;
- 3. Collect, compile, analyse, abstract and disseminate statistical information on the matters specified in the first schedule;
- 4. Conduct the population and housing census every ten years, and such other censuses and surveys as the board may determine;
- 5. Maintain a comprehensive and reliable national socio-economic database.
- 6. Develop and maintain sampling frames of the bureau;
- 7. Collaborate with and assist the county governments or any other institutions in the production of official statistics;
- 8. Provide technical advice on statistics to other state entities;
- 9. Promote co-ordination among producers, users and suppliers of official statistics by forming appropriate sector committees; and
- 10. Designate statistics produced by national statistical system as official statistics on being satisfied that the necessary criteria have been followed.

#### Vision

To be a global leader in the provision of quality statistical services

#### Mission

To provide, manage and promote quality statistical services through utilisation of best practices for evidence-based decision making

#### **Core Values**

Professionalism; Integrity; Confidentiality; Customer Focus; Innovation; and Teamwork.

H.E. Hon. (Dr.) Moses N. Badilisha Kiarie
THE GOVERNOR, NYANDARUA COUNTY

#### **Preface**

The County Government of Nyandarua is proud to present the 2022 Statistical Abstract, a comprehensive and detailed report on the key economic, social, and demographic indicators of our county. The data herein has been collected from the year 2015 to 2021.

This credits the county as one of the few to have a 10-year official data set on key county deliverables/outputs since the inception of devolution. This publication serves as a valuable resource for policymakers, researchers, businesses, and the general public, providing insights into the most important trends and patterns shaping our nation's development.

This edition of the abstract is only second since devolution and features an in-depth examination of the impact of various interventions by the County Government, the National Government, development partners and other stakeholders taking up the functions and responsibilities in the improvement of the county citizenry's welfare. The County Government entities, National Government Ministries, Departments and other teams of experts have worked tirelessly to collect, compile, and analyse the most up-to-date data to provide a comprehensive understanding of the effects of various programmes and projects implemented by the County government and other agencies operationalizing programmes within Nyandarua County among other key changes and trends over the last 10 years.

The data and information included in this report is the result of a comprehensive and rigorous process of data collection, verification, and analysis. The Kenya National Bureau of Statistics (KNBS) in collaboration with Nyandarua County is committed to providing the highest quality data and insights to support informed decision-making, research, and policy-making in Government and its agencies.

We would like to acknowledge and thank all the individuals, organizations, and government agencies that have contributed to the production of the Nyandarua County Statistical Abstract - 2022. Their hard work and dedication are essential for the production of this important publication and the advancement of the Kenya Kwanza Government agenda of Bottom Up through which support is optimally focused on those whose means are limited for their empowerment and advancement for better socio-economic indicators and overall wellbeing of the country at large.

We hope that this Statistical Abstract serves as a useful and informative tool for all those who consult it from policymakers to the learners in our tertiary institutions among others.

H.E. Hon. (Dr.) Moses N. Badilisha Kiarie

THE GOVERNOR, NYANDARUA COUNTY

Macdonald G. Obudho, MBS

DIRECTOR GENERAL

KENYA NATIONAL BUREAU OF STATISTICS

#### **Foreword**

The first principle in the United Nation's Fundamental Principle of Official Statistics states that official statistics provide an indispensable element in the information system of a democratic society, serving the government, the economy, and the public with data about the economic, demographic, social and environmental situation. To this end, official statistics that meet the test of practical utility are to be compiled and made available on an impartial basis by official statistical agencies to honour citizens' entitlement to public information. It is within this internationally accepted norm embedded in the Statistics Act, 2006, that the 2022 Nyandarua County Statistical Abstract (CSA) was produced.

In line with its mandate of collaborating with and assisting the county governments or any other institutions in the production of official statistics in the country, the Kenya National Bureau of Statistics (KNBS) collaborated with County Government of Nyandarua to produce the 2022 Nyandarua CSA. The 2022 Nyandarua CSA is a single source of information that presents the official statistics produced by Ministries, Departments and Agencies (MDAs) both at National Government and the County Government of Nyandarua. This publication provides data series on various sectors of the economy at the county level for the period 2015 to 2021. The data is mostly from administrative records and sample surveys conducted within the period.

The production of the 2022 Nyandarua CSA has gone through all the recommended stages of producing official statistics. The statistics generated were validated by the MDAs within Nyandarua County both from National and the County Government. The data were reviewed by the technical team from KNBS and County Government of Nyandarua.

The 2022 Nyandarua CSA is categorised into an introductory chapter and three other chapters based on the classification of statistical activities undertaken by national and international statistical organisations. This classification follows the statistical subject-matter domains used in the Database of International Statistical Activities (DISA) with three domains of; Demographic and Social Statistics; Economic Statistics; and Environment and Multi-Domain Statistics.

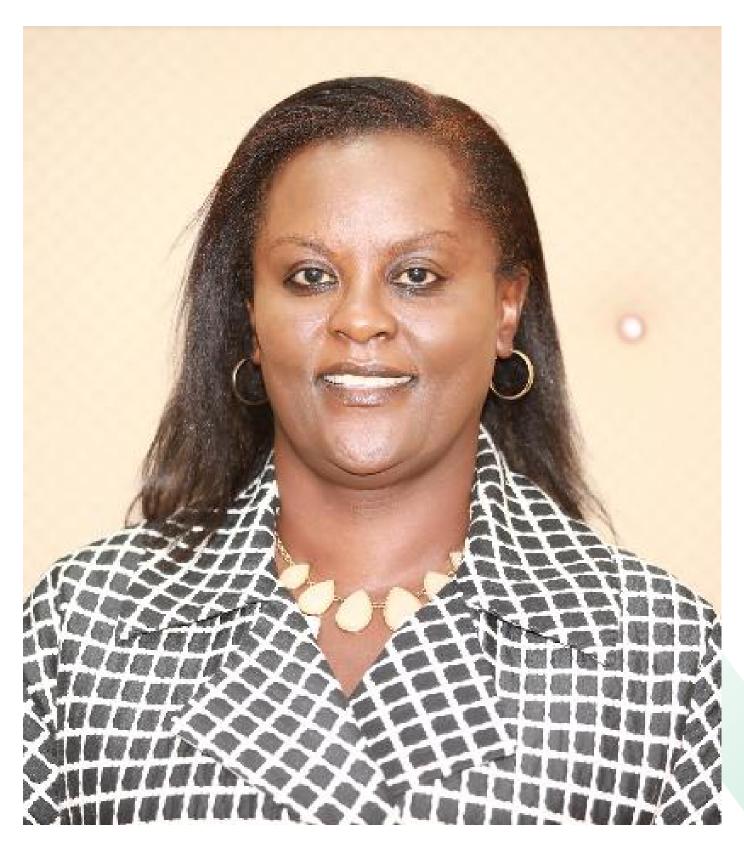

We welcome the readers to this publication and encourage offer positive critique aimed at improving the contents and quality of future publications. KNBS appreciates the collaboration that has resulted in the production of this publication which contains a comprehensive set of indicators that are useful for planning and policy formulation for Nyandarua County.

A Tradition

Macdonald G. Obudho, MBS

Director General

Kenya National Bureau of Statistics

Hon. Mary W. Kamande

C.E.C.M. – FINANCE, ECONOMIC PLANNING AND ICT

Acknowledgement

Nyandarua County through the Economic Planning Unit in the Finance, Economic Planning and ICT

Department is striving to fill the data gaps that have been noted in the County's policy formulation processes

and decision-making process.

I take this opportunity to acknowledge the hard work and dedication of all the members of staff from the

County and National departments and entities involved in the collection, compilation, and dissemination of

statistical data for the generation of the County Statistical Abstract 2022.

The production of a statistical abstract is a complex and labour-intensive process that requires the coordination

and collaboration of many people across various fields and disciplines. Their efforts play a vital role in providing

accurate and reliable information for use in research, policy-making, and decision-making. It is important to

recognize the significance of their contributions to the advancement of knowledge and the betterment of

society.

In particular, I take note of the Economic Planning Unit for having arduously coordinated the whole exercise

and acting as intermediaries in having the data as guided by the KNBS. The Bureau's role has been invaluable.

The County Statistical Officer, Bryan Atema has contributed immensely to this in collaboration with the team

from KNBS headquarters.

We look forward to annually updated County Statistical Abstracts that will strive to capture outputs geared

to particular sectoral outcomes for better monitoring and evaluation of the county's performance in the

advancement of the government's agenda for the betterment of the county's resident's welfare.

Hon. Mary W. Kamande

#### **Symbols**

The following symbols have been used in this publication

- "\*" Means figures are provisional and may change in subsequent CSAs
- "-" Means nil or negligible (less than half the final digit shown)
- ".." Means figures not available
- "I" between consecutive figures means they have been compiled on a different basis and are not strictly comparable. The nature of the difference is usually indicated as a footnote.

Rounding of figures: In tables where figures have been rounded to the nearest final digit, there may be an apparent slight discrepancy between the sum of the constituent items and the total as show

#### **A: Introduction**

The Second Nyandarua County Statistical Abstract (CSA) has been prepared through the joint effort of the County Government of Nyandarua (CGN), Kenya National Bureau of Statistics (KNBS) and National Government Ministries and Autonomous/Semi-autonomous Agencies at the County Level.

The CSA presents the demographic, economic, social, political and environmental statistics for Nyandarua County, for a period ranging from the 2015 to 2021 Calendar period or FY 2015/16-FY 2021/22 fiscal period.

The abstract is prepared to provide a single source of data and statistics that is useful to inform decision making, planning and research for various users including the general public. The information was mainly compiled from administrative records, and partly from surveys and censuses as indicated under each table.

This is the second CSA to be prepared, after the publication of the first CSA in 2015. Data users may seek additional information from the County Government on the content of this abstract.

#### A.1 Overview of Nyandarua County

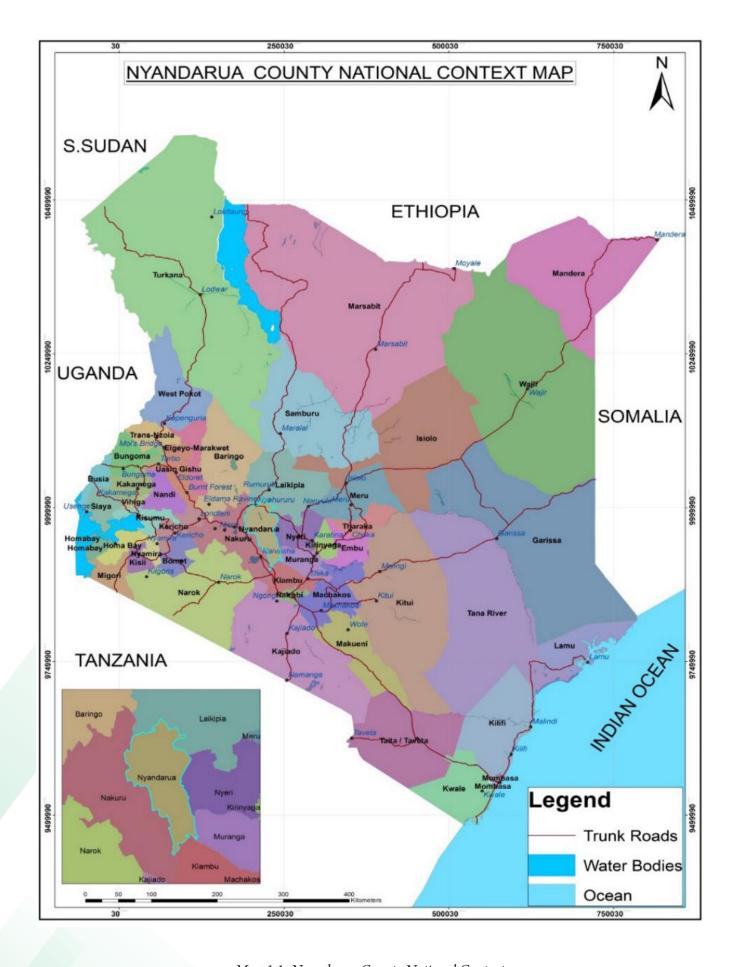

#### A.1.1 Nyandarua County in the East African Context

Nyandarua County is located in the North-Western part of former Central Province of Kenya. The County is connected to Uganda and Tanzania by primary roads: Ol'Kalou-Miharati-Engineer Road (B20) and Ol'Kalou-Gilgil road (A4) that join the Nairobi-Nakuru Transnational Highway (A8) at Nakuru and Gilgil respectively. The highway then connects the County to Uganda via Eldoret, Webuye and Malaba and to Tanzania via road (A12) through Kisumu, Migori and Isebania. The locational advantage opens up vast trading and investment opportunities within East Africa due to an enlarged market and the ease of transporting raw materials as well as finished products.

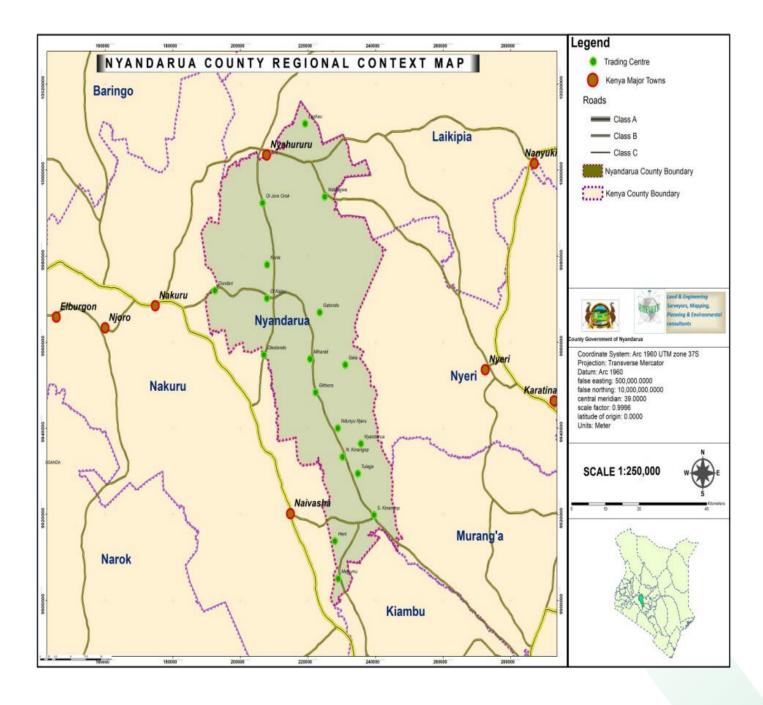

#### A.1.2 Nyandarua County in the National Context

Nyandarua County lies in the central part of Kenya between latitude 0°8' North and 0°50' South and between Longitude 35° 13' East and 36°42' West. It is linked to the other counties through the major trunk roads. To Nairobi, it is connected via (A8) to Mombasa, and to Kisumu via (A12). Ol'Kalou, the County headquarters, is situated about 150 kilometres North West of Nairobi. Ol'Kalou town has strong economic ties with other regional towns such as Nyahururu, Gilgil, Naivasha, Kiambu, Embu, Nakuru and Nyeri.

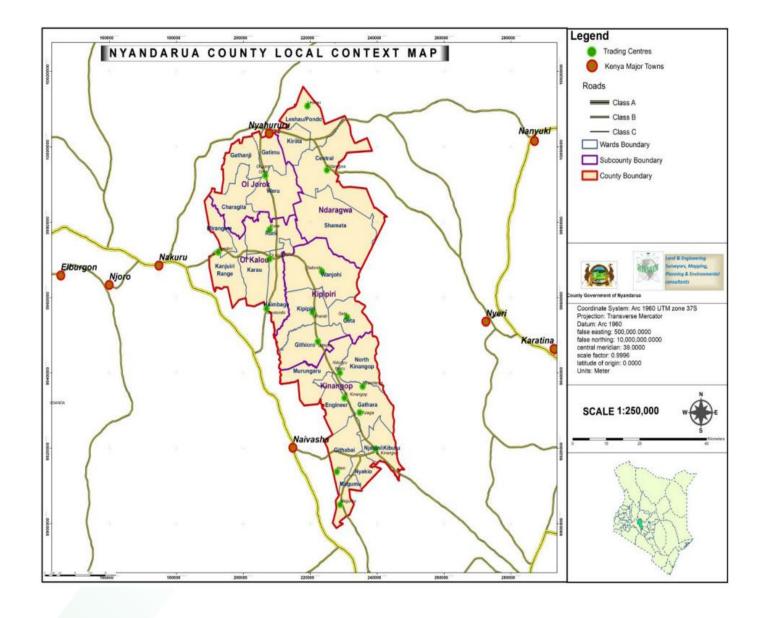

The major economic activities in the County include farming, quarrying and trade. Agriculture is the backbone of Nyandarua's economy due to the fertile soils and favourable climate. It is considered the food basket of Kenya because of its high production of potatoes, cabbages, carrots, peas and milk that are sold in Nairobi and most other towns in the country. The location of Nyandarua County is shown in Map 1.1.

Map 1.1: Nyandarua County National Context

Map 2.2: Nyandarua County Regional Context

#### A.2 Physiographic and Natural Conditions

#### A.2.1 Physical and Topographic Features

The topography of Nyandarua County is a mixture of plateaus and hilly areas. The County's physiography was a result of volcanism and faulting that created the major land forms namely: The Great Rift Valley to the west and the Aberdare ranges to the east. The highest point of the Aberdare Ranges is about 3,999 metres above sea level. The lowest parts include Lake Ol'Bolossat, Leshau and the northern part of Central Ward, lower Kaimbaga and the western parts of Kipipiri, Githioro and Murungaru Wards. The flat areas include Kinangop and Ol'Kalou/Ol'Joro Orok plateaus.

Over time, rock weathering has transformed the Aberdare ranges, which dissected the slopes into shallow valleys and the gorges with deep and well-drained soils. As they approach Ol'Kalou and Kinangop plateaus, these valleys flatten with only a few gorges draining river water down the escarpment and onto the floor of the Rift Valley. Ol'Kalou Salient Plateau in the north and Kinangop Plateau to the south stretch north-south between the Aberdare ranges and a system of fault scarps which form the escarpment. Dundori Hills represent a high weathering resistant block of scarp. The two plateaus extend to about 80 km from north to south and about 40 km wide north of Ol'Kalou town. Gentle slopes interrupted by low hills flatten into marshlands and swamps. The rest of the land is well-drained and has fertile soils. The soils in the County are of volcanic origin and vary in fed distribution. Soils in the Kinangop and Ol'Kalou plateau are poorly drained clay loams. However, Ndaragwa, northern part of Ol'Joro Orok and Ol'Kalou has well drained clay loams. These soils have different crop production potentials. The plateaus contain the key settlement zones where development in the County is carried out.

There are eight permanent rivers; Malewa, Ewaso Narok, Pesi, Turasha, Chania, Kiburu, Mkungi and Kitiri. Lake Ol'Bolosat which is the largest water mass in the County is fed by streams and underground water seepage from the Aberdare and Dundori hills. Human activities and clearing of the catchments areas for settlement has affected its natural refilling system and its existence is threatened.

The Aberdare Ranges are one of the country's major water catchment areas. Moreover, the Aberdare ecosystem constitutes of a dense forest with several animal species including elephants, baboons, Columbus monkeys, tree and ground squirrels, porcupines and many bird species. On the slopes of the Aberdare ranges are also the Mau Mau caves in Geta and Kimathi. The ranges offer great potential for local and foreign tourism in the County as they border the Aberdare National Park to the east and can be developed as nature trails and for mountain climbing.

#### **A.2.2 Ecological Conditions**

Some areas in the County are in the highland savannah zone, characterised by scattered trees with expansive grass cover. In elevated areas, tree cover increases forming thick forests with thick undergrowth. However, most of the natural vegetation has been cleared leading to environmental hazards such as environmental degradation which has claimed large portions of arable land. This has had some negative effects such as reduced rainfall, soil erosion, reduced soil fertility, poor health and reduced food production.

#### **A.2.3 Climatic Conditions**

#### A.2.3.1 Rainfall

Nyandarua County has a cool and temperate climate with reliable rainfall which is generally well distributed throughout the year. In a typical year, the County experiences two rainy seasons: long rains from March to May with a maximum rainfall of 1,600 mm and short rains from September to December with a maximum rainfall of 700 mm. The average annual rainfall of the County is 1,500 mm. The major relief features which consist of Kinangop plateau, the Ol'Kalou Salient Plateau, the Aberdare Ranges and the Dundori Hills influence rainfall distribution in the area, with areas like Njabini and South Kinangop receiving higher amounts of rainfall while areas of Ndaragwa and Ol'Kalou receive comparatively low rainfall. Areas near the Aberdare slopes receive sufficient rainfall with the plateau receiving scanty and erratic rainfall. Winds in Nyandarua generally blow from East to West. The average speed is about five knots. Frost also occurs in the wee hours of the morning and its effects are felt more in zones bordering the Aberdare Ranges.

#### A.2.3.2 Temperature

The County has a moderate temperature. High temperatures, which are low by national average, are experienced between December and March with the lowest temperatures occurring in July. The highest temperature in December has a mean average of 21.5 degrees centigrade while the lowest in July have a mean average of 7.1 degrees centigrade. Variation of the temperature has adverse effects especially on maize cultivation; when cold air during clear nights on the moorlands of the Aberdare Ranges flows down the Kinangop and Ol'Kalou Plateaus it causes night frost almost monthly. These temperatures range between 1°C and 2°C and last a few hours before sunrise

#### A.2 Overview of County Government of Nyandarua

#### Structure and Functions of the County Government

The 2010 Constitution of Kenya created a two-tier government structure with one National Government and forty-seven devolved County Governments. The County Governments consist of two arms, namely the County Executive and the County Assembly.

The functions of County Governments are contained in the Fourth Schedule of the 2010 Constitution to include Agriculture; County Health services; Control of air pollution, noise pollution, other public nuisances and outdoor advertising; Cultural activities, public entertainment and public amenities; County transport; Animal control and welfare; Trade development and regulation; County planning and development; Pre-primary education, village polytechnics, homecraft centres and childcare facilities; Implementation of specific national government policies on natural resources and environmental conservation; County public works and service; Firefighting services and disaster management; Control of drugs and pornography; Ensuring and coordinating the participation of communities and locations in governance.

#### **The County Executive**

The Executive arm is constituted of the Governor, Deputy Governor, the County Executive Committee (CEC), County Departments and entities, and the county public service.

The Governor and Deputy Governor are elected through a general election for a five-year term, and the Governor is eligible for election for a one final term. The County Executive Committee Members are appointed by the Governor, and approved by the County Assembly.

#### **The County Assembly**

The County Assembly is the legislative arm of the County Government. Its functions include legislation, general oversight of the County Government and representation of the people. It consists of Members of County Assembly (MCAs) elected from the 25 Wards in the County, nominated MCAs representing special interest groups such as persons with disability and the youth, and the Speaker who is an ex-officio member.

## **Statistical Domain 1:** Demographic and Social Statistics

#### 1.1: Population and Migration

This section contains population and demographic statistics. The topics include demography, vital statistics, population structures and growth, demographic projections, families and households (marriages, divorces, household size), migration, refugees and asylum seekers.

**Excludes** 

- causes of death

#### **Notes and Definitions**

**Density:** Refers to the number of persons per square Kilometre, obtained by dividing the enumerated persons in a given area by the size of the area expressed in Km<sup>2</sup>.

**Area:** is the extent of a surface enclosed within a specified boundary, expressed in square Kilometres. This excludes areas covered by water.

**Birth:** is the complete expulsion or extraction from its mother of a product of conception, irrespective of the duration of pregnancy.

**Death:** is the permanent disappearance of all evidence of life at any time after live birth has taken place (postnatal cessation of vital functions without capability of resuscitation). This definition excludes foetal deaths.

**Expected Birth or Expected Death:** Is derived from the prevailing fertility or mortality conditions and total female population of reproductive age or the total population. The number of expected births or deaths is calculated using age-specific birth and death rates.

*Place of Occurrence:* It is where birth or death occurs.

**Coverage rate:** Coverage rate is basically the percentage of registered events out of the total number of expected events. Although the denominators ideally should be the total number of events which occurred, the actual number of such events is unknown and hence estimated as 'expected events.'

**Births or Deaths Registered at Health Facilities:** Refer to births or deaths that occur at a health facility and a notification is issued by a health worker at the facility.

**Births or Deaths Registered outside Health Facilities:** Refer to births or deaths that occur at home and a notification is issued by the Assistant Chief.

**Duplicate ID:** Refers to an identity card (ID) issued for replacement of lost, misplaced or damaged ID card. **Persons with disability:** refers to persons who have long-term physical, mental, intellectual or sensory impairments which in interaction with various barriers may hinder their full and effective participation in society on an equal basis with others'

Elderly persons: these are persons of 70 years and above

*Orphans:* these are needy children who are without both parents, one parent.

**Vulnerable:** these are persons who need special care, support, or protection because of age, disability, or risk of abuse or neglect.

## 1.2: Labour

This section covers statistics on labour force, labour market, employment and unemployment; the more detailed topics include economically active population, labour conditions, health and safety at work (accidents at work, occupational injuries and diseases, work-related health problems), working time and other working conditions, strikes and lockouts, job vacancies, job creation.

#### **Excludes**

- migrant workers
- unemployment insurance and unemployment benefits
- trade union membership
- unpaid work
- statistics on earnings, wages and salaries
- labour cost

#### **Notes and Definitions**

**Establishment:** The establishment is defined as an enterprise or part of an enterprise. It is an economic unit operating in a specific location in which a clearly defined economic activity is undertaken. It operates generally at a single location and engages predominantly in one type of economic activity. Thus, a large firm or enterprise with branches would have one of such branches referred to as an establishment because of its unique location and economic activity undertaken in that location.

**Economic Activity:** It is an activity related to production, distribution, exchange and consumption of goods and services.

**Regular Workers:** Regular workers refer to working owners/operators, fully paid employees, unpaid family members, and apprentices.

**Employment:** The term employment refers to performance of work for wage or salary in cash or in kind. It is a term used to measure the number of persons employed. Includes persons at work during a short reference period.

**Permanent Employee:** This is a person who is employed on an indefinite basis, subject to a probationary period that is reasonable with reference to the nature of the job (normally not more than six months) and work up to certain set age limit. Example: Public servants

**Contract Employees:** These are employees who work under some contractual arrangement with the employer and are hired for a specific job at a specific rate of pay. Contract employees work on short term basis.

**Labour force participation rate:** The section of working population in the age group of 15-64 in the economy currently employed or seeking employment. People who are still undergoing studies, housewives and persons above the age of 64 are not included in the labour force.

**The dependency ratio**: The number of dependents aged zero to 14 and over the age of 65, compared with the total population aged 15 to 64.

Table 1.2.1: Total Dependency Ratio and Distribution of the Working Population (15-64) by Sex and Sub County, 2019

# 1.3: Education

This section includes statistics on educational participation, illiteracy, educational institutions and systems, human and financial resources invested in education, lifelong learning, vocational training and adult learning, impact of education, assessments of student performance, etc.

This section covers enrolment, educational institutions and infrastructure, human and financial resources invested in education, vocational training and adult learning.

# **Notes and Definitions**

*Public School:* A school established, owned or operated by the government (Basic Education Act, 2013).

**Private School:** A school established, owned or operated by private entrepreneurs and institutions (Basic Education Act, 2013).

**Net enrolment rate**: Enrolment of the official age group for a given level of education expressed as a percentage of the corresponding population.

**Gross enrolment rate:** Total enrolment in a specific level of education, regardless of age, expressed as a percentage of the eligible official school-age population corresponding to the same level of education in a given school year.

#### 1.4 Health

Health – covers the health and mortality related statistical activities, including topics like life expectancy, health status, health and safety, health determinants (including lifestyle, nutrition, smoking, alcohol abuse), health resources and expenditure, health care systems, morbidity and mortality (including infant and child mortality), hospital admission, causes of illness and death, specific diseases (e.g., AIDS), disabilities, pharmaceutical consumption and sales, health personnel, remuneration of health professions, environmental health status, health inequality, health accounts.

#### **Excludes**

- work related health and safety
- victimisation from criminal behaviour
- traffic accidents and injuries

## Notes and Definitions

**Health Facility:** This is a defined a health service delivery structure from where services are provided e.g., Outpatient, pharmacy, laboratory. Government facilities are the ones which are gazetted and Non-Government facilities are registered with the regulator.

- **Level 1 Community Health Unit:** This is a health service delivery structure within a defined geographical area covering a population of approximately 5,000 people.
- *Level 2 Dispensaries:* Refers to the lowest point of contact with the public. These are run and managed by enrolled and registered nurses who are supervised by the nursing officer at the respective health centre.
- **Level 3 Health Centres:** They have a clinical officer as in-charge and provide comprehensive primary care and mainly focus on preventive care such as childhood vaccination. They are medium-sized units which cater for a population of about 80,000 people.
- **Level 4 Sub County Hospitals:** Are hospitals which are the co-ordinating and referral centre for the smaller units. They usually have the resources to provide comprehensive medical and surgical services. They are managed by medical superintendents.
- **Level 5 County Hospitals**: These are regional centres which provide specialised care including intensive care and life support and specialist consultations. These are referral points for the sub county hospitals.
- Level 6 National Referral Hospitals: Refers to National referral hospitals offering very specialised services. They include Kenyatta National Hospital, Moi Teaching and Referral Hospital, Mathari National Teaching and Referral Hospital, etc.

Morbidity: Refers to the existence of any form of disease, or to the degree that the health condition affects the patient. *Outpatient morbidity:* The number of cases a client visits a health facility for treatment without spending the night (being admitted) in that facility.

#### 1.5 Social Protection

Social protection – deals with statistics on measures to protect people against the risks of inadequate incomes associated with unemployment, ill health, invalidity, old age, parental responsibilities, or inadequate income following the loss of a spouse or parent, etc.,

includes statistics on pension beneficiaries, social security schemes, social protection expenditure, etc.

# 1.9 Political and Other Community Activities

Political and other community activities – statistics on voting turnout, participation in political and other community activities, trade union membership, social dialogue, civil society, social capital, etc.

#### **Notes and Definitions**

**County:** It is an area that is demarcated as a devolved unit as stated under Article 6 (1) of the Kenya's Constitution and specified in the First Schedule of the Constitution;

*Sub County:* Refers to both Administrative Units of National Government and County Government. In most areas it coincides with the Constituency area.

**Constituency:** this is an area demarcated as stated under Article 89 of the Kenyan Constitution for the purpose of electing a member of the National Assembly specified in Article 97(1a). There are 290 constituencies in Kenya.

**County Assembly:** means an assembly constituted in the county in accordance with Article 177 of the Constitution.

*Ward:* this is an electoral area within a county delimited in accordance with Article 89 of the Kenya's Constitution for the purpose of electing a member of the County Assembly. There are 1,450 wards in Kenya.

# Statistical Domain 2: Economic Statistics

#### 2.1 Economic Accounts

This section gives details on Gross County Product. Gross County Product (GCP) is a measure of how much each county contributes to Kenya's Gross Domestic Product (GDP) and may therefore be interpreted as the "County GDP".

The GCP measures newly created economic value through production of goods and services in a specific county. The compilation of GCP is in accordance with international guidelines on estimation of regional gross domestic product. The GCP estimates are meant to address increased demand for county economic statistics such as size, growth rate, and structure of the economies. The GCP analytics show that while some counties have a small contribution to the national GDP, they have greater potential for faster rate of growth and potential for catch-up with the dominant contributors

#### **Excludes**

- agricultural economic accounts
- tourism satellite accounts
- detailed general government accounts
- financial accounts
- price statistics
- environmental accounts

### **Notes and Definition**

*Gross Domestic Product (GDP)*: The total value of goods and services produced by resident producer units of a country for a specified period of time, usually one year. It is the sum of gross value added of all resident producer units (institutional sectors or industries).

**Gross County Product (GCP)**: is a measure of how much each county contributes to Kenya's Gross Domestic Product (GDP) and may therefore be interpreted as the "County GDP". The GCP measures newly created economic value through production of goods and services in a specific county.

**GDP at Market Prices:** The sum total of the gross values added of all resident producers at producers' prices, less subsidies on imports, plus all non-deductible Value Added Taxes (VAT) (or similar taxes).

**GDP at Current Prices:** The total value of goods and services valued at prices of the particular year of reporting. This is also referred to as nominal GDP.

**GDP at Constant Prices**: The total value of goods and services of the current year using prices of a determined base year.

**Per Capita GDP:** The average production per person of goods and services for a specified period i.e., one year. It is used to compare the relative welfare or standard of living in different countries in a particular period.

*Gross Value Added at Basic Prices*: Output valued at basic prices; less intermediate consumption valued at purchasers' prices.

#### 2.2 Business Statistics

Business statistics – economy wide statistics on the activities of enterprises, covers work on economic statistics across different sectors. Deals with topics like statistics on economic activities of enterprises, business demography, business investment, business services, demand for services, industrial performance, enterprises by size class, industrial production, commodities, structure of sales and services, outputs of the service industries, non-profit institutions.

#### Excludes:

- business tendency surveys
- international trade
- prices
- labour cost
- science and technology
- ICT
- activities of foreign affiliates and multinational companies

#### **Notes and Definitions**

Data presented comprise revenue collection from single business permits and number of licensed Businesses.

**Single Business Permit:** The permit allows for the conduct of business or trade within the county. The permits are issued by the County Governments. All single business permits expire at the end of every year and there is a period within which renewal must be done.

**Revenue:** means fees, levies, charges, penalties, fines or other monies imposed and collected under the written laws set out or adopted by the County Assembly of Nyandarua

**Revenue payer:** means a client/person liable to pay a rate, fee or charge to the county government under revenue law(s).

**Invoice:** A statement that summarizes the total amount for services rendered.

**Penalty:** A punitive measure that the law imposes on clients who fail to diligently file and pay for their statutory taxes

*Client:* A person who consumes services provided by the County Government of Nyandarua

Table 2.2.1: Revenue Collection from Single Business Permits, 2015/16-2021/22

Year	Revenue (KES)
2015/16	80,724,977
2016/17	83,273,680
2017/18	82,463,495
2018/19	87,993,193
2019/20	77,823,838
2020/21	99,790,334
2021/22*	90,714,711

 $Source: Department\ of\ Trade,\ Investment\ and\ Industrialization,\ County\ Government\ of\ Ny and arua$ 

#### 2.3 Sectoral Statistics

Sectoral statistics – statistical activities dealing with one of the specific branches of industry or services mentioned at the three-digit level of the classification.

#### Excludes:

- education
- health
- social security
- culture
- statistics covering the whole industrial sector
- statistics covering the whole service or market service sector
- distributive trade
- government and public sector statistics
- research and development
- telecommunication statistics

## 2.3.1 Agriculture, Forestry, Fisheries

Agriculture, forestry, fisheries – includes all agriculture, forestry and fishery related statistics, e.g. agricultural monetary statistics (agricultural economic accounts), agricultural structures (farm structure), trade in agricultural products, agricultural labour input, crop and animal production, agricultural commodities, agro-industry statistics (including food production and safety), organic farming and organic food, government expenditure for agriculture, fishing and forestry, products source and use tables, forest and forest product statistics, forest resource assessment and forest fire, trade in forest products, fisheries.

#### Excludes

- agricultural and similar prices
- rural development

#### **Notes and Definitions**

*High Potential:* Clay-loam soil with sufficient manure and good drainage

Medium Potential: Sandy-loam soil with high drainage

Low Potential: Sandy soil with very high drainage and low manure content

**Agro-Ecological Zones** (**AEZ**): Refer to the Division of an area of land into smaller units, which have similar characteristics related to land suitability, potential production and environmental impact.

**Reporting Period:** The data is reported on calendar year as opposed to seasonal basis. Therefore, for crops where planting and harvesting may take place more than once in the year, the production data is aggregated

to get the annual data

**Agricultural Area:** refer to area under the crop or the area harvested. For a particular crop, the area reported is on what has been harvested

**Arable Land:** the land under temporary agricultural crops (multiple-cropped areas are counted only once), temporary meadows and pastures (for less than five years), land under market and kitchen gardens, barnyards, and land temporarily fallow (for less than five years). The abandoned land resulting from shifting cultivation is not included in this category. Data for "Arable land" are not meant to indicate the amount of land that is potentially cultivable.

*Crop Production:* Refers to the actual harvested production from the field and excludes threshing losses and that part of crop not harvested for any reason.

*Land potential:* Capacity of land to resist and recover from degradation.

**Aquaculture:** This is the farming of aquatic organisms such as fish, molluscs, crustaceans, plants, crocodiles, alligators, and amphibians.

**Horticulture:** The art of cultivating plants in gardens to produce food and medicinal ingredients, or for comfort and ornamental purposes.

**Livestock Production:** Management and breeding of domestic livestock or farm animals for the purpose of obtaining their meat and products.

**Farm gate Prices:** The value of production given in this report uses farm gate prices as the basis of valuation of the production from the County. Farm gate price is the price paid to farmer at the farm level and hence excludes margins on transport.

*Hides and Skins:* A hide, or skin is an animal skin treated for human use. Hides are defined as "skins" of large animals e.g cow, buffalo; while skins refer to "skins" of smaller animals, such as goats, sheep, deer, pigs, etc.

*Livestock Primary Products:* include products from live and slaughtered animals. Products from slaughtered animals include meat, offal, raw fats, fresh hides, and skins. Products from live animals include milk, eggs, honey, beeswax, and fibres of animal origin.

**Abattoir:** this refers to any slaughter plant e.g. slabs, slaughterhouses, gantry.

*Slaughterhouse:* this refers to a building/house meant for slaughter of animals for human consumption

*Slab:* This is the smallest of categorized slaughterhouse whose kill are small numbers: not more than 5 heads of cattle and whose target market is the nearest market Centre.

*Gantry:* A gantry is a structure used to straddle an object or animals being slaughtered. They are capable of lifting some of the animals being slaughtered.

*Milk Processor:* this is a plant that processes above 20,000 litres per day or has an installed capacity of the same.

**Cottage Processor:** this is a small milk processor that processes any reasonable quantity of up to 1,000 litres per day.

*Milk Cooler:* this is a plant involved only in the cooling of milk; no value is added to the milk.

Fish Pond: is a controlled pond or reservoir that is stocked with fish and is used in aquaculture for fish farming.

*Inland Fish:* refers to fish captured from the inland water surface bodies e.g. lakes, rivers etc.

*Culture Fish:* refers to fish captured from the ponds.

Forest: A forest is an area of land dominated by trees.

*Gazetted Forest:* Any forest area, or woodland or any part thereof, declared by notice in the Kenya Gazette Supplements, and which has a particular environmental, cultural, scientific, or other special significance, to be a nature reserve for the purpose of preserving its biodiversity.

**Nursery:** A place where plants are grown for transplanting, for use as stock for budding and grafting, or for sale. Commercial nurseries produce and distribute woody and herbaceous plants, including ornamental trees, shrubs, and bulb crops.

## **2.3.2 Energy**

Energy - energy supply, energy use, energy balances, security of supply, energy markets, trade in energy, energy efficiency, renewable energy sources, government expenditure on energy.

**Excludes** 

- energy prices

## **Notes and Definitions**

**Domestic Use:** These are domestic customers. They are low voltage level (240 /415kV) users

**Small Commercial:** These are medium commercial and industrial customers. They are medium Voltage level (11&33 kV) users

*Industrial Use:* These are large commercial and industrial customers. They are High Voltage level (66 & 132 kV) users

Street Lighting: They are low voltage level (240 /415kV) users

**Pump Prices:** These are the maximum retail petroleum prices calculated by the Energy Regulatory Authority in accordance with Legal Notice No.196 of 2010.

Table 2.3.2.1: Average Monthly Pump Prices in Kenya Shillings for Fuel by Category, 2015-2021

# 2.3.3 Mining, Manufacturing, Construction

Mining, manufacturing, construction – statistics on specific industrial activities, e.g. steel, shipbuilding, and on construction, trade in specific products related to mining, manufacturing and construction.

#### **Excludes**

- prices of manufactured products
- construction prices

## **Notes and Definitions**

**Residential:** A residential building is defined as the building which provides more than half of its floor area for dwelling purposes. In other words, residential building provides sleeping accommodation with or without cooking or dining or both facilities.

**Non-Residential:** Non-residential buildings consists of buildings other than dwellings such as the warehouses and industrial buildings, commercial buildings, buildings for public entertainment, hotels, restaurants, educational buildings, health buildings, etc.

**Floor Area:** Floor area or floor space is the area (measured as square feet or square metres) taken up by a building or part of it.

## 2.4 Transport

Transport – covers statistics on all modes of transport (air, rail, road, inland waterways, sea), includes topics like transport infrastructure, equipment, traffic flows, personal mobility, safety, energy consumption, transport enterprises, passengers and freight transport, transport sector trends, road traffic accidents.

#### **Excludes**

- transport prices

#### **Notes and Definitions**

**International Trunk** (Class A) Roads: Class A roads comprise international trunk roads linking centres of international importance and crossing international boundaries or terminating at international ports or airports, e.g., Uganda Road.

**National Trunk (Class B) Roads:** Class B roads link former provincial headquarters and other important

centres to the capital, to each other or to the international road network.

**Primary (Class C) Roads:** Class C primary roads link provincially important centres to each other or higher-class roads; this has been reinterpreted more recently to mean linking district headquarters to each other and higher-level roads or centres.

**Secondary Roads (Class D):** Roads which link locally important centres to each other, or to more important centres or to a higher-class road (e.g., divisional headquarters).

*Minor Roads (Class E):* Roads which link to a minor centre.

**KURA** is responsible for the management, development, rehabilitation and maintenance of National Trunk Roads in the urban areas of the Republic of Kenya.

**KeNHA** is responsible for the management, development, rehabilitation and maintenance of International Trunk Roads (Class A roads) and National Trunk Roads in the urban areas of the Republic of Kenya.

**KeRRA** is responsible for the management, development, rehabilitation and maintenance of rural roads (Secondary roads)

## 2.6 Banking, Insurance, Financial Statistics

Banking, insurance, financial statistics – money, banking and financial market statistics, including financial accounts, money supply, interest rates, exchange rates, stock market indicators, securities, bank profitability, private sector insurance and pension fund statistics, Financial Soundness Indicators.

### **Excludes**

- beneficiaries of private pension funds
- financing of state pension and of other state social security schemes

#### **Notes and Definitions**

**Banks:** These are organizations where people and businesses can invest or borrow money and exchange foreign currency.

**Insurance Companies:** A business that provides coverage, in the form of compensation resulting from loss, damages, injury, treatment or hardship in exchange for premium payments.

*Micro Finance institutions:* These are organizations that offer financial services to low-income populations. They include deposit and non-deposit taking ones.

*Forex Bureau:* An over-the-counter market where buyers and sellers conduct foreign exchange transactions.

**Cooperative:** Cooperative is an autonomous association of persons united voluntarily to meet their common economic, social, and cultural needs and aspirations through a jointly owned and democratically controlled enterprise".

**Savings and Credit Cooperative Society (SACCOs):** These are cooperatives which provide their members with convenient and secure means for saving money and obtaining credit at affordable interest rates.

**Active:** Refers to members who are continuously engaged in an activity on a day-to-day basis or after some laid down intervals by the entities or accounts (as of Sacco's or bank accounts) that are continuously used or been operated before the lapse of a certain period usually 1 year in most entities

**Dormant:** Something that is dormant is not active, growing, or not being used at the present time but is capable of becoming active later

**Share Capital:** Refers to the total of cooperatives' shares that are held by members. It is withdrawn only when one ceases to be a member of the cooperative.

**Turnover:** Refers to the total sales made by a business in a certain period. It's sometimes referred to as 'gross revenue' or 'income'

## 2.7 Government Finance, Fiscal and Public Sector Statistics

Government finance, fiscal and public sector statistics – all statistics related to the government sector, including debt and deficit, revenue and expenditure, accounts of the government sector, central government, tax rates and revenues, tax and benefit systems, financing of state pension and other state social security schemes, public sector employment.

#### **Excludes**

- government expenditure in specific areas, like health, education, research and development, etc.

#### **Notes and Definitions**

*Equitable Share:* These are Funds established under the Article 217 of the constitution. The parliament shares vertically between the national and the county governments. The money comes from the ordinary revenue the National Government raises nationally. The Senate then allocates the equitable share for the counties from the vertical share horizontally among the 47 counties.

**Conditional Allocation:** These are additional allocations from the national government's equitable share of revenue (from the vertical sharing).

**County Government Revenue:** means all money derived by or on behalf of a county government from levies, rates, fees, charges or any other source authorized by the Constitution or an Act of Parliament.

**Rebate:** a partial refund to processed tea and coffee from the county.

### 2.8 Prices

Prices – covers any statistical activity dealing with prices, including Purchasing Power Parities (PPPs) and international comparisons of GDP, covers topics like Consumer Price Indices (CPI), inflation, Producer Price Indices (PPI), price indexes for specific products and services (e.g. Information and Communication Technology products).

### **Notes and Definitions**

**Retail:** The sale of goods to the public in relatively small quantities for use or consumption rather than for resale.

**Wholesale:** Wholesale is the resale (sale without transformation) of new and used goods to retailers, to industrial, commercial, institutional or professional users. Wholesalers frequently physically assemble, sort and grade goods in large lots, break bulk, repack and redistribute in smaller lots.

**Consumer:** A consumer is one that buys goods or services for consumption and not for resale or commercial purpose. The consumer is an individual who pays some amount of money for the thing required to consume goods and services.

**Commodity:** A commodity is a basic good used in commerce that is interchangeable with other goods of the same type. Examples of commodities include grains, gold, beef, oil, and natural gas among others.

Retail and wholesale prices are collected every week from the retail and wholesale markets, respectively, to determine the variation in both retail and wholesale prices. Weighing scales are used to measure the quantity of the commodity to convert non-standard units to standard units.

### 3.2 Multi-domain Statistics and Indicators

Multi-domain statistics and indicators – deals with conceptual or data work based on a specific thematic approach to outputs that cut across several economic, social or environmental subject areas; the two-digit-level of the classification covers activities dealing with such type of issues that are not explicitly mentioned at the three-digit level.

### **Excludes:**

- multi-domain statistics based on a regional approach
- yearbook type of compendia or similar products by international organisations not following a specific thematic approach

### 3.2.1 Gender and Special Population Groups

Gender and special population groups – their living conditions and role in the society: comparisons men/ women and situation of special population groups like children, youth, women, elderly, disabled, minority groups, etc
